

Based on the detailed PDF report provided, here is the analysis for **LT.NS (Larsen & Toubro)** as of January 17, 2026.

Step 1: Audit the Data

- * **Data Present:**
 - * Daily & Weekly price charts with moving averages (EMA 20, 50, 200).
 - * Fundamental Analysis (Revenue, Net Income, ROE - Long term & Short term).
 - * Relative Strength (RS) analysis against CNXINFRA.
 - * Technical Indicators: MACD, Bollinger Bands, Supertrend, RSI, and Volume Analysis.
 - * Distribution/Accumulation signals.
- * **Data Missing:**
 - * **CRITICAL ERROR:** Pages 22 and 23 of the PDF (Trendlyne Snapshots) display data for **Reliance Industries Ltd**, not LT.NS. This data (Forecaster, Shareholding, Analyst Estimates) must be discarded as it does not pertain to the target stock.
 - * Specific Sector rotation charts (though RS against Infrastructure index is present).
- * **Confidence Level:** **Medium-High**.
 - * The technical data for LT.NS (Pages 1-21) is robust and self-consistent. The fundamental and sentiment data on the last two pages must be ignored due to the mismatch.

Step 2: Analyze the Setup

- * **Price Structure & Trend:**
 - * **Long-Term:** The stock remains in a structural uptrend, trading above the rising 200-day EMA (3769). The Weekly chart (Page 21) confirms a primary uptrend, though it is currently in a deep pullback.
 - * **Intermediate-Term:** The trend has shifted to ****Bearish****. The stock is trading below the 20-day (4003) and 50-day (3993) EMAs. The Daily Supertrend is explicitly in a "Sell" mode (Page 10).
 - * **Short-Term:** The price is undergoing a sharp correction, having fallen from highs of ~4200 to the current ~3856.
- * **Momentum & Volume:**
 - * **Momentum:** Highly negative. MACD is bearish and accelerating downwards (Page 13).
 - * **Volume:** Five "Distribution Days" were detected in January 2026 alone (Page 18), indicating significant institutional selling pressure during this drop.
 - * **RSI:** The RSI is at **28.73** (Oversold). While this indicates the selling is overextended, "Oversold" can persist in a strong downtrend.
- * **Confluence:**
 - * The stock is approaching a **critical confluence zone**: The **200-day EMA** is at 3769.93, and the Lower Bollinger Band is at 3841.
 - * The current price (3856) is sandwiched between the Lower Bollinger Band and the 200 EMA. This area typically acts as a major institutional support level for intermediate-term trends.

Step 3: Formulate the Recommendation

Verdict: **NO**. Do not enter immediately at the current market price.

Reasoning: While the stock is fundamentally sound and in a long-term uptrend, the short-term momentum is aggressively bearish (falling knife). Buying now opposes the immediate momentum of "Distribution Days" and a Sell-mode Supertrend. You are effectively trying to catch a falling knife before it hits the floor (the 200 EMA).

Recommendation: Wait for a reaction at the primary support level (200 EMA) to confirm stabilization before entering.

Conditional Plan (Wait for the Setup):

* **Condition to Buy:**

* **Primary Trigger:** Wait for the price to test the **3770 - 3800** zone (200 EMA support). Enter **ONLY IF** a bullish reversal candle (Hammer, Doji, or **Bullish** Engulfing) forms on the Daily chart in this zone.

* **Secondary Trigger (Momentum Reversal):** Alternatively, if the price does not dip that low, wait for a Daily Close above **3,920** (reclaiming the lower breakdown level and stabilizing inside the Bollinger Bands).

* **Entry Price (Hypothetical):** **INR 3,800 - INR 3,825** (Assuming a successful bounce off the 200 EMA).

* ****Stop Loss:**** **INR 3,730** (Hard Close below the 200 EMA. If this major trendline breaks, the intermediate uptrend is invalid).

* ****Take Profit:****

* **Target 1:** **INR 4,000** (Convergence of 20/50 EMAs).

* **Target 2:** **INR 4,150** (Retesting previous highs).

Risk/Reward Ratio: Approximately 1:3 at the conditional entry.

News & Analyst Targets

As a stock research analyst at an investment firm, I have compiled the latest research and market intelligence for **Larsen & Toubro (L&T)** for the week ending **January 17, 2026**.

1) Latest News for L&T This Week (Jan 12 - Jan 17, 2026)**

* **Major Order Win - Petronet LNG (Jan 16):** L&T's Hydrocarbon Onshore vertical secured a "Large" order (classified between **INR 2,500 - INR 5,000 Crore**) from Petronet LNG. The project involves the engineering, procurement, and construction (EPC) of LNG, Ethane, and Propane storage tanks at the Dahej Petrochemical Complex in Gujarat.

* **Major Order Win - Torrent Energy (Jan 14):** The Heavy Civil Infrastructure business won a prestigious order from Torrent Energy Storage Solutions for the **3,000 MW Saidongar-1 Pumped Storage Project** in Raigad, Maharashtra. This is one of the largest pumped storage projects in India.

* **Q3 FY26 Earnings Date:** The company is scheduled to announce its financial results for the quarter ended December 31, 2025, on **January 28, 2026**.

* **Stock Performance:** L&T shares witnessed a ~1% rise on Friday (Jan 16) following the Petronet order announcement, showing resilience despite broader sector volatility.

2) Brokerage Upgrades & Downgrades**

* **HSBC (Target Cut):** On January 14, **HSBC** maintained its **HOLD** rating but **cut its target price to INR 3,900** (from INR 4,000). The brokerage cited macro concerns, including global volatility and fiscal constraints, which could weigh on domestic capex and order inflows in FY27, despite a decent Q3 expected.

* **JM Financial (Reiteration):** On January 15, **JM Financial** reiterated its **BUY** rating with a target price of **INR 4,500**, highlighting the company's strong order book and execution capabilities.

* **ICICI Securities (Buy Call):** Earlier in the month (Jan 4), **ICICI Securities** recommended a **BUY** rating on L&T with a target price of **INR 4,520**, identifying it as a top pick for the pre-budget rally.

3) Other News Impacting L&T**

* **Subsidiary Weakness (LTTS Earnings):** L&T's listed subsidiary, **L&T Technology Services (LTTS)**, reported weak Q3 FY26 results on Jan 16, with a revenue miss and a guidance cut. LTTS shares fell ~5%, which created some negative sentiment ripple effects for the parent company, though L&T's core infrastructure wins offset this.

* **Kuwait Project Clarification:** L&T management issued a clarification earlier this week regarding media reports on the cancellation of oil project tenders in Kuwait. The company confirmed that these cancelled projects were **not** part

of its current order book, alleviating investor fears regarding revenue visibility.

* **Auditor Re-structure:** The company's statutory auditors, M S K A & Associates, converted to a Limited Liability Partnership (LLP) structure effective Jan 13, 2026.

4) Latest Analyst Targets (Jan 2026)

The consensus among the analyst community remains largely positive, with domestic brokerages maintaining aggressive targets compared to foreign brokerages like HSBC.

Brokerage / Source	Rating	Target Price (INR)	Sentiment / Key Rationale
---	---	---	---
ICICI Securities	BUY	**4,520**	Bullish on pre-budget capex themes and technical strength.
JM Financial	BUY	**4,500**	Valuation comfort and strong order backlog visibility.
Motilal Oswal	BUY	**4,500**	Expecting strong execution in H2 FY26.
HSBC	**HOLD**	**3,900**	Cautious on macro headwinds and slowing order intake growth.
Consensus Mean	BUY	**~4,600**	General consensus remains roughly 18-20% upside from CMP.

*Note: CMP (Current Market Price) as of Jan 17, 2026, is hovering in the **INR 3,900 - INR 4,000** range.*
